SUBJECT: ENGLISH LANGUAGE. CLASS: SS 1

HOLIDAY'S FUN (THE JOY OF BEING A STUDENT)

1. Write a story ending with the words: "Indeed, it was an awesome experience." **(395 words)**
2. Write a letter to your uncle who lives and works abroad, informing him of at least (any) three important and unforgettable experiences you have had during President Bola Ahmed Timubu's regime from the day he took over from his predecessor, Let. Gen. Muhammadu Buhari till date. **(390 words)**
3. ***Read the passage below and answer the questions on it.***

THE LOST PRINCESS

In April 2004, Sarah Culberson got a call she'd spent nearly 30 years waiting for. "'This is your father, Joseph Konia Kposowa. Please forgive me," begged the caller. "I didn't know how to find you," Sarah then 28, had had no previous contact with her birth parents. Her adoptive parents Jim and Judy Culberson, had told her what little they knew. Her biological father had been an exchange student from Sierra Leone, attending Salem College in West Virginia. He dated a young white woman who worked at West Virginia University. When she became pregnant, they decided to give the baby up. The couple separated, and Sarah's father returned to his homeland. Now he was urging his daughter to come visit. "As a member of the royal family," he told her, "you could be chief here some day." At that moment, Sarah knew her life had changed forever. From now on, she would be inextricably connected to a small, war-ravaged village halfway across the globe.

Sarah took a leadership training course and during one session the instructor asked, "Where are you holding back in your life? Tell the person sitting next to you." Sarah turned at an old friend named Art. "I'm terrified of finding my biological father," she confessed. Art assured her that the search could bring her peace and said he knew a private investigator who could locate her father for less than a hundred dollars.

The detective after just three hours of sleuthing, turned up a Joseph Kposowa in Maryland. Sarah laboured over an introductory note and nervously sent it off. Soon afterward, she got a phone call from a woman with a lilting accent. "Sarah? This is Evelyn, your auntie. I was there

when you were born." Sarah broke down in sobs. Once she'd composed herself, she learned that this Joseph was actually her uncle. He then got on the phone and asked, "Do you know you are a princess?"

Sarah, he explained, belonged to a ruling family of the Mende tribe in Southern Sierra Leone, a nation of six million on Africa's Atlantic coast. Her grandfather had ruled a chiefdom with 36,000 subjects based in the village of Bumpe. When the old man died, Sarah's father could have nominated himself for the office, but he opted to keep his job as headmaster of the local high school. Another uncle was now chief.

The information made Sarah's head spin. But it wasn't until her father called, two weeks later, that she began to comprehend its full significance.

Questions

(a) How did Sarah's biological parents meet?

(b) Why did Sarah believe that her life had changed after talking to Joseph Konia?

(c) What was Sarah terrified of?

(d) How did Sarah locate her biological father?

(e) "You could be a chief here some day" How is this possible?

(f) "…a call she'd spent nearly 30 years waiting for"

What figure of speech is used in this expression?

(g) At that moment.

(i) What grammatical name is given to this expression as it is used in the passage?

(ii) What is its function?

(h) For each of the following words, find another word or phrase which means the same and which can replace it as it is used in the passage: (i) birth (ii) homeland

(Have a pleasant moment of resting and rejuvenation or revitalisation)

Best wishes from Mobasa.

Answer all questions

1. Of the 35 students in a class, 20 play basketball, 18 play keyboard and 9 play both. How many play neither?
2. X = πab where, $\pi = \frac{22}{7}$, a= 14 b=1 find x.
3. r= $\sqrt{x^2}$+y2, where x = 5, y= 3. Find the value of r.
4. t= $\frac{3p}{r}$, + s P=5, r=10 s=20. Find the value of t.
5. Multiplication of modulo 5.
6. Use the table to solve 9 2) +(2x2)
7. Convert 111101111_{two} to base 10.
8. Convert 123_{ten} to base 5.
9. Explain the following with examples:
   i. Intersection
   ii. Union of sets
   iii. Disjoint
   iv. Null set
   v. Universal set
10. Draw addition table of modulo 6.
